

PRI Vision's Instructional Pool

PRI Vision is pleased to announce expansion into aquatic design, working closely with the skilled hydrodynamic capabilities of **Vision Aquatics, Inc.** PRI's science incorporating unrestricted tri-planar movement and diaphragmatic respiration has now been integrated with patterns of aquatic feed-forward resistance to isolate and inhibit specific muscle function. Patented aquatic workstations and concepts developed in association with **Ron Hruska of Postural Restoration Institute** combined with the state-of-the-art advanced composite pool technology of **Vision Aquatics** brings aquatic therapy to a completely new level of sophistication and restoration through a range of products we call **Aquatic Postural Restoration**.

The **PRI-VA1020 Instructional Pool** is designed for education and instruction of PRI integration concepts and PRI neuromotor strategy. This is the top-of-the-line PRI Vision pool, and is appropriate for a broad range of PRI-related diagnosis and treatments.

Pool Dimensions - main pool section is 10 ft. by 20 ft. (actual water) and 4.0 ft. deep. The attached Prism Passage is 6 ft. by 13 ft. (actual water) at the widest point and 4.0 ft. deep.

Treatment Stations - PRI patented science-based feed-forward stations.

- **Entry Stairs** with dual handrails and attached benches.
- **Hip Lounge** with poolside digital LED controls, variable speed water therapy jets, and hand-held spa jet wand.

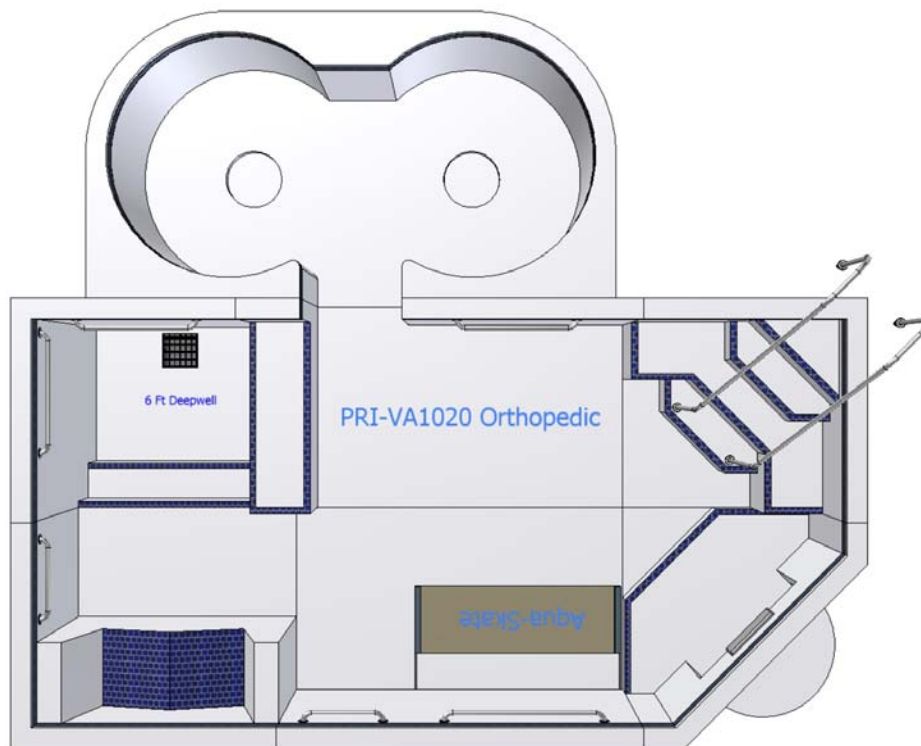

- **Hemi-Hula Hoop** with poolside digital LED controls, variable speed water therapy jets, and circular telescoping safety grab rail.
- **Rotation Cove** with poolside digital LED controls, variable speed water therapy jets, and adjustable swivel chair for seated protocols. (chair is removable for standing protocols).
- **AquaSkate Station** with poolside digital LED controls, variable speed water therapy jets, skate slide platform, (2) pairs of skate booties, and 4 ft. stabilization grab rail.
- **Prism Passage** with (2) poolside digital LED controls, variable speed water therapy jets, and (2) centered aquatic turntables.
- **Bench Station** with hand-held spa jet wand and controls.
- **Deep Well Station** with 6 ft depth, (2) 3 ft. grab rails, and (4) rope rings for tethers.
- **Wall Reach Station** with (1) 2 ft. grab rail, and (6) rope rings for tethers.
- **Prism Vision Corridors** - this pool includes (2) corridors for PRI vestibular techniques.

The Instructional Pool contains PRI patented treatment stations that are used in the rehabilitation of structural joint dysfunction and related postural issues. This pool enables the clinician to integrate PRI techniques to reduce characteristic positions of postural imbalance and their compensatory patterns. PRI-VA1020 Instructional offers patient capacity of seven (7) patients at the same time.

PRI Vision's Orthopedic Pool

The **PRI-VA1020 Orthopedic Pool** supports the lumbo-pelvic-femoral needs of traditional healthcare environments supporting orthopedic practice, and is most appropriate for patients with hip, back or knee dysfunction, athletic injuries, and orthopedic surgical complications.

Pool Dimensions - main pool section is 10 ft. by 20 ft. (actual water) and 4.0 ft. deep. The attached Prism Passage is 6 ft. by 13 ft. (actual water) at the widest point and 4.0 ft. deep.

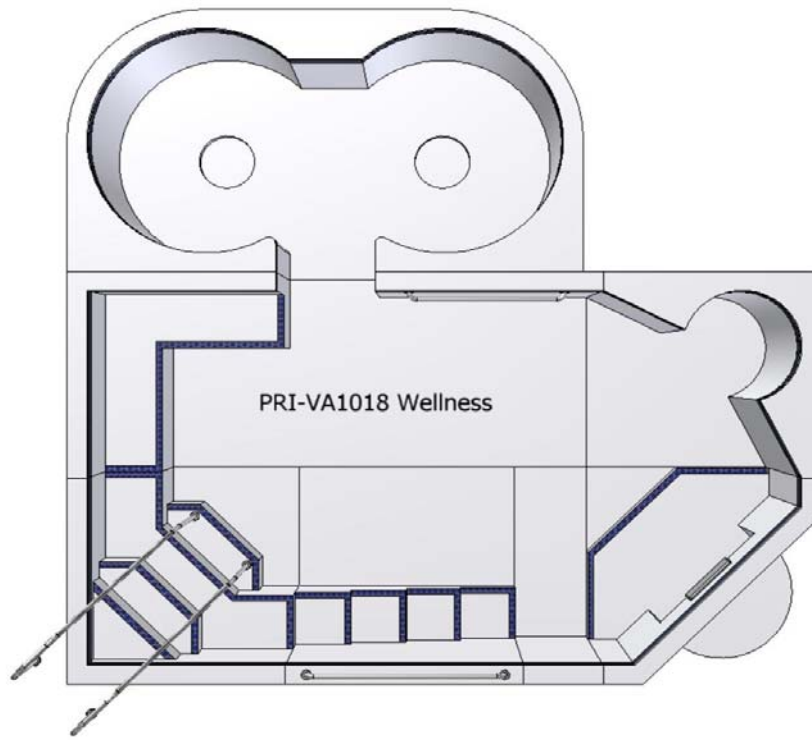

Treatment Stations - PRI patented science-based feed-forward stations.

- **Entry Stairs** with dual handrails and attached benches.
- **Hip Lounge** with poolside digital LED controls, variable speed water therapy jets, and hand-held spa jet wand.
- **Retro Stair Station** with poolside digital LED controls, variable speed water therapy jets, and 5 ft. safety grab rail, and 6" progressive stairs.
- **Rotation Cove** with poolside digital LED controls, variable speed water therapy jets, and adjustable swivel chair for seated protocols. (chair is removable for standing protocols).
- **AquaSkate Station** with poolside digital LED controls, variable speed water therapy jets, skate slide platform, (2) pairs of skate booties, and 4 ft. stabilization grab rail.
- **Prism Passage** with (2) poolside digital LED controls, variable speed water therapy jets, and (2) centered aquatic turntables.
- **Bench Station** with hand-held spa jet wand and controls.
- **Deep Well Station** with 6 ft depth, (2) 3 ft. grab rails, and (4) rope rings for tethers.
- **Wall Reach Station** with (1) 2 ft. grab rail, and (6) rope rings for tethers.
- **Prism Vision Corridors**-this pool includes (2) corridors for PRI vestibular techniques.

The Orthopedic Pool contains PRI patented treatment stations that are used in the rehabilitation of structural joint dysfunction and related postural issues. This pool enables the clinician to integrate PRI techniques to reduce characteristic positions of postural imbalance and their compensatory patterns. PRI-VA1020 Orthopedic offers patient capacity of seven (7) patients at the same time.

PRI Vision's Wellness Pool

The **PRI-VA1018 Wellness Pool** is designed to support patients in assisted-living and senior care facilities, Skilled Nursing Facilities (SNF's), and step-down facilities. This pool offers the most inclusive and efficient selection of treatment stations for PRI integration for assisted care.

Pool Dimensions - main pool section is 10 ft. by 18 ft. (actual water) and 4.0 ft. deep. The attached Prism Passage is 6 ft. by 13 ft. (actual water) at the widest point and 4.0 ft. deep.

Treatment Stations - PRI patented science-based feed-forward stations.

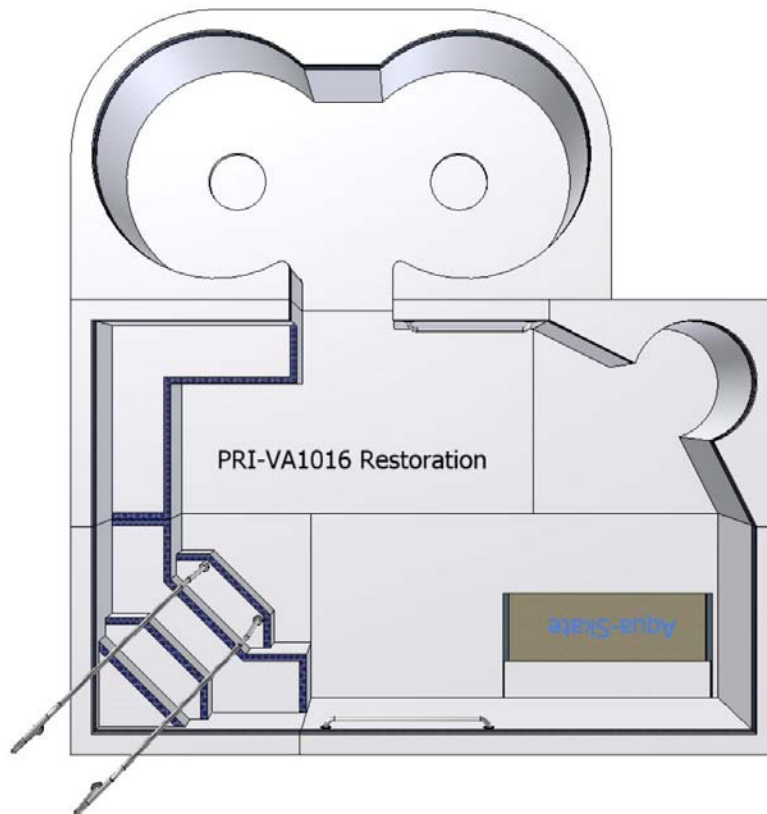

- **Entry Stairs** with dual handrails and attached benches.
- **Retro Stair Station** with poolside digital LED controls, variable speed water therapy jets, 5 ft. safety grab rail, and 6" progressive stairs.
- **Hemi-Hula Hoop** with poolside digital LED controls, variable speed water therapy jets, and circular telescoping safety grab rail.
- **Rotation Cove** with poolside digital LED controls, variable speed water therapy jets, and adjustable swivel chair for seated protocols. (chair is removable for standing protocols).
- **Prism Passage** with (2) poolside digital LED controls, variable speed water therapy jets, and (2) centered aquatic turntables.
- **Bench Station** with hand-held spa jet wand and controls.
- **Wall Reach Station** with (1) 2 ft. grab rail, and (6) rope rings for tethers.
- **Prism Vision Corridors** - this pool includes (1) corridor for PRI vestibular techniques.

The Wellness Pool contains PRI patented treatment stations that are used in the rehabilitation of structural joint dysfunction and related postural issues. This pool enables the clinician to integrate PRI techniques to reduce characteristic positions of postural imbalance and their compensatory patterns. PRI-VA1018 Wellness offers patient capacity of seven (7) patients at the same time.

PRI Vision's Restoration Pool

The **PRI-VA1016 Restoration Pool** is designed to support clinics and other facilities (such as health clubs or spa-type healthcare facilities), and is appropriate for motor-learning challenged patients as well as casual use. Beneficial after land-based activity or exercise, and requires minimal guidance or instruction.

Pool Dimensions - main pool section is 10 ft. by 16 ft. (actual water) and 4.0 ft. deep. The attached Prism Passage is 6 ft. by 13 ft. (actual water) at the widest point and 4.0 ft. deep.

Treatment Stations - PRI patented science-based feed-forward stations.

- **Entry Stairs** with dual handrails and attached benches.
- **AquaSkate Station** with poolside digital LED controls, variable speed water therapy jets, skate slide platform, (2) pairs of skate booties, and 4 ft. stabilization grab rail.
- **Hemi-Hula Hoop** with poolside digital LED controls, variable speed water therapy jets, and circular telescoping safety grab rail.
- **Prism Passage** with (2) poolside digital LED controls, variable speed water therapy jets, and (2) centered aquatic turntables.
- **Bench Station** with hand-held spa jet wand and controls.
- **Wall Reach Station** with (1) 2 ft. grab rail, and (6) rope rings for tethers.
- **Prism Vision Corridors** - this pool includes (1) corridor for PRI vestibular techniques.

The Restoration Pool contains PRI patented treatment stations that are used in the rehabilitation of structural joint dysfunction and related postural issues. This pool enables the clinician to integrate PRI techniques to reduce characteristic positions of postural imbalance and their compensatory patterns. PRI-VA1016 Restoration offers patient capacity of seven (7) patients at the same time.

Options for all PRI-VA Pools include the following:

- Salt Water System
- AquaVision camera and recording systems
- ChemLink Water Quality Control System
- AquaLevel

Pool Construction - proprietary composite pool shell with 2" by 2" non-skid tile finish with epoxy base grout. Warrantee is 10 years structural and 10 years for finish.

VGB 2008 Compliant - all Vision PRI pools meet or exceed Virginia Graeme Baker Act 2008 as required by the U.S. Consumer Product Safety Commission for commercial pools.

Commercial Pool Equipment - Vision PRI pools include energy efficient filtration systems, 200,000 BTU gas fired heaters, and solid state one touch control systems.
